

## Breast Cancer Symposium, April 24<sup>th</sup>, 2004

### Pre- and Post-Test Results

The following table displays the results of the pre- and post-test conducted at the recent Breast Cancer Symposium. If you took part in the test you will have been given a test number. Find the test number in the list below and look across the row for your results. Each test was marked out of 23.

You may view the pre- and post-test answer sheet, which has been provided by the Continuing Medical Education committee of the Surgical Oncology Network.

Thank you for taking part in the pre- and post-test. Results show that there was a statistically significant improvement ( $p < 0.001$ ) in understanding of breast cancer management throughout the day. If you have any questions, please contact Rona Cheifetz, Chair of the CME committee for the Surgical Oncology Network.
