

Moving Forward: A Study of Support and Education for Young Breast Cancer Survivors

A new national study of support for young women survivors of breast cancer begins September 2010 and will be enrolling participants through the summer of 2012. In this randomized control trial we are testing the effectiveness of educational support and professional or peer-led online support groups.

Everyone who takes part in this study will receive a free workbook that gives information about coping after cancer, an instructional CD, and a relaxation CD. Register today at CancerChatCanada.ca or call us at 1-800-663-3333 ext 4966

To be eligible, you must be under 46 years old, not more than 3 years past your last treatment date and be able to speak and write in English.

The Principal Investigator for this study is Dr. Joanne Stephen (1-800-663-3333 ext. 4960) at the British Columbia Cancer Agency. The study is funded by the Canadian Breast Cancer Research Alliance.
