

BC Cancer Agency

CARE + RESEARCH

An agency of the Provincial Health Services Authority

Cancer Surveillance & Outcomes

Cancer Incidence Projections

Vancouver Coastal Health Authority 2010 to 2025

Estimated New Cancer Diagnoses for 2010 by Age at Diagnosis and Gender

(Version_BC.CAN13)

Vancouver Coastal Health Authority

Poisson regression models of the trend from 2000-2009 along with age, sex and region were fit for each cancer type. Mean rates for 2008-2009 replaced projected rates for breast (female only) and prostate as extrapolation from recent trends was not feasible. Projections were obtained by multiplying the projected rates by population projections obtained from BC STATS. Row and column totals were obtained prior to rounding.

Estimated New Cancer Diagnoses for 2017 by Age at Diagnosis and Gender

(Version_BC.CAN13)

Vancouver Coastal Health Authority

Poisson regression models of the trend from 2000-2009 along with age, sex and region were fit for each cancer type. Mean rates for 2008-2009 replaced projected rates for breast (female only) and prostate as extrapolation from recent trends was not feasible. Projections were obtained by multiplying the projected rates by population projections obtained from BC STATS. Row and column totals were obtained prior to rounding.

Estimated New Cancer Diagnoses for 2024 by Age at Diagnosis and Gender

(Version_BC.CAN13)

Vancouver Coastal Health Authority

Poisson regression models of the trend from 2000-2009 along with age, sex and region were fit for each cancer type. Mean rates for 2008-2009 replaced projected rates for breast (female only) and prostate as extrapolation from recent trends was not feasible. Projections were obtained by multiplying the projected rates by population projections obtained from BC STATS. Row and column totals were obtained prior to rounding.

Estimated Cancer Deaths for 2022 by Age at Death and Gender

(Version_BC.CAN13)

Vancouver Coastal Health Authority

Poisson regression models of the trend from 2000-2009 along with age, sex and health authority were fit for each cancer type. Projections were obtained by multiplying the projected rates by population projections obtained from BC STATS. Row and column totals were obtained prior to rounding.

Cancer Type	0-19		20-39		40-59		60-79		80+		All Ages		Total
