PANCREAS/AMPULLA OF VATER
STAGING DIAGRAM

ECOG Performance Status at Referral
Circle: 0 1 2 3 4

CA19-9 at Referral (N<37)
Specify Value: ___________

SITE:
- Ampulla of Vater
- Body of Pancreas (those arising between the left border of the superior mesenteric vein and left border of the aorta)
- Head of Pancreas (those arising to the right of the left border of the superior mesenteric vein; includes the uncinate process)
- Islets of Langerhans (endocrine pancreas)
- Pancreas, NOS
- Pancreatic Duct
- Tail of Pancreas (those arising between the left border of the aorta and the hilum of the spleen)

HISTOLOGY:
- New
- Recurrent Disease
- Referred for Follow up

TNM 2009

Clinical/Pathological

Completed by: ____________________________ Date: ______________________

Diagnosis/Stage Amended to: ____________________________

Reason: ____________________________ Date: ______________________

By: ____________________________ Date: ______________________

NOTIFY DATA QUALITY & REGISTRY IF STAGE/DIAGNOSIS IS AMENDED
PANCREAS (ICD-O C25)¹
TNM 2009 CLINICAL & PATHOLOGICAL

Note¹: The classification applies to carcinomas of the exocrine pancreas and pancreatic neuroendocrine tumours including carcinoids.

PRIMARY TUMOUR (T)

TX Primary tumour cannot be assessed
T0 No evidence of primary tumour
Tis Carcinoma in situ (also includes the ‘PanIN-III’ classification)
T1 Tumour limited to pancreas, 2 cm or less in greatest dimension
T2 Tumour limited to pancreas, more than 2 cm in greatest dimension
T3 Tumour extends beyond pancreas, but without involvement of celiac axis or superior mesenteric artery
T4 Tumour involves celiac axis or superior mesenteric artery

REGIONAL LYMPH NODES (N)¹

NX Regional lymph nodes cannot be assessed
N0 No regional lymph node metastasis²
N1 Regional lymph node metastasis

Note¹: Regional lymph nodes are the peripancreatic nodes, subdivided as follows:
Superior - superior to head and body
Inferior - inferior to head and body
Anterior - anterior pancreaticoduodenal, pyloric (for tumours of head only), and proximal mesenteric
Posterior - posterior pancreaticoduodenal, common bile duct, and proximal mesenteric
Splenic - hilum of spleen and tail of pancreas (for tumours of body and tail only)
Coeliac - (for tumours of head only)

Note²: Histological examination of a regional lymphadenectomy specimen will ordinarily include 10 or more lymph nodes. If the lymph nodes are negative, but the number ordinarily examined is not met, classify as pN0.

DISTANT METASTASIS (M)

M0 No distant metastasis (only applicable for clinical staging – i.e. if a cM1 is biopsied and is negative, it becomes cM0, not pM0)
M1 Distant metastasis

AMPULLA OF VATER (ICD-O C24.1)¹
TNM 2009 CLINICAL & PATHOLOGICAL

Note¹: The classification applies only to carcinomas.

PRIMARY TUMOUR (T)

TX Primary tumour cannot be assessed
T0 No evidence of primary tumour
Tis Carcinoma in situ
T1 Tumour limited to ampulla of Vater or sphincter of Oddi
T2 Tumour invades duodenal wall
T3 Tumour invades pancreas
T4 Tumour invades peripancreatic soft tissues, or other adjacent organs or structures

REGIONAL LYMPH NODES (N)¹

NX Regional lymph nodes cannot be assessed
N0 No regional lymph node metastasis²
N1 Regional lymph node metastasis

Note¹: Regional lymph nodes are as follows:
Superior - superior to head and body of pancreas
Inferior - inferior to head and body of pancreas
Anterior - anterior pancreaticoduodenal, pyloric, and proximal mesenteric
Posterior - posterior pancreatic-oduodenal, common bile duct and proximal mesenteric

Note²: Histological examination of a regional lymphadenectomy specimen will ordinarily include 10 or more lymph nodes. If the lymph nodes are negative, but the number ordinarily examined is not met, classify as pN0.

DISTANT METASTASIS (M)

M0 No distant metastasis (only applicable for clinical staging – i.e. if a cM1 is biopsied and is negative, it becomes cM0, not pM0)
M1 Distant metastasis

Note¹: Splenic lymph nodes and those of the tail of the pancreas are considered distant (M1).
