PHARYNX STAGING DIAGRAM
AJCC 7th Edition for Diagnosis Date ≥ 01 January 2010
Definitions for T, N, and M Descriptors

PRIMARY TUMOR (T)

- TX Primary tumor cannot be assessed
- T0 No evidence of primary tumor
- Tis Carcinoma in situ

Oropharynx

- T1 Tumor 2cm or less in greatest dimension
- T2 Tumor more than 2cm but not more than 4cm in greatest dimension
- T3 Tumor more than 4cm in greatest dimension or extension to lingual surface of epiglottis
- T4a Moderately advanced local disease. Tumor invades the larynx, extrinsic muscle of tongue, medial pterygoid, hard palate, or mandible*
- T4b Very advanced local disease. Tumor invades lateral pterygoid muscle, pterygoid plates, lateral nasopharynx, or skull base or encases carotid artery

* Mucosal extension to lingual surface of epiglottis from primary tumors of the base of the tongue and vallecula does not constitute invasion of larynx.

Hypopharynx

- T1 Tumor limited to one subsite of hypopharynx and/or 2cm or less in greatest dimension
- T2 Tumor invades more than one subsite of hypopharynx or an adjacent site, or measures more than 2cm but not more than 4cm in greatest dimension without fixation of hemilarynx
- T3 Tumor more than 4cm in greatest dimension or with fixation of hemilarynx or extension to esophagus
- T4a Moderately advanced local disease.
Tumor invades thyroid/cricoid cartilage, hyoid bone, thyroid gland, or central compartment soft tissue*
- T4b Very advanced local disease.
Tumor invades prevertebral fascia, encases carotid artery, or involves mediastinal structures

* Central compartment soft tissue includes prelaryngeal strap muscles and subcutaneous fat.

REGIONAL LYMPH NODES (N)

- NX Regional lymph nodes cannot be assessed
- N0 No regional lymph node metastasis
- N1 Metastasis in a single ipsilateral lymph node, 3cm or less in greatest dimension
- N2 Metastasis in a single ipsilateral lymph node, more than 3cm but not more than 6cm in greatest dimension; or in multiple ipsilateral lymph nodes, none more than 6cm in greatest dimension; or in bilateral or contralateral lymph nodes, none more than 6cm in greatest dimension
- N2a Metastasis in single ipsilateral lymph node more than 3cm but not more than 6cm in greatest dimension
- N2b Metastasis in multiple ipsilateral lymph nodes, none more than 6 cm in greatest dimension
- N2c Metastasis in bilateral or contralateral lymph nodes, none more than 6cm in greatest dimension
- N3 Metastasis in a lymph node more than 6cm in greatest dimension

DISTANT METASTASIS (M)

- M0 No distant metastasis (no pathologic M0; use clinical M to complete stage group)
- M1 Distant metastasis
