

RECENTLY COMPLETED TREATMENT FOR HEAD AND NECK CANCER?

Protocol number H21-02218

Provide feedback and help design a new app to pave the way for easier understanding and decision-making around treatment options and side effects.

To register or learn more contact: Eleah Stringer
eleah.stringer@bccancer.bc.ca or 250-519-5523

What? Attend two, 1-hour workshops, as part of the Head and Neck Application for Patients and their Partners (HANC APP) Study.

Where? Your choice- you can attend in-person at BC Cancer- Victoria or over Zoom.

When? Workshops will be held monthly during the fall season.

Who? Patients who have completed treatment at BC Cancer within the previous 10 years (radiation and or chemotherapy, with or without surgery) for head and neck cancer are eligible to participate.

PURPOSE

To gather feedback and recommendation from patients who have completed treatment for head and neck cancer on the design and functionality of an electronic, decision-support tool (ie an app). **This app may better inform patients of what to expect through and after treatment and guide their treatment decisions.** With health technology developers, together we will create the app, with the **ultimate goal of improving care to patients with head and neck cancer.**

Your health care will not be impacted if you do not join the study or decide to leave the study.
