BC Cancer Protocol Summary for Palliative Treatment of Advanced Pancreatic Neuroendocrine Tumours using SUNItinib

Protocol Code  GIPNSUNI

Tumour Group  Gastrointestinal

Contact Physician  GI Systemic Therapy

ELIGIBILITY:
- Well to moderately differentiated, unresectable or metastatic pancreatic neuroendocrine tumours (PNET)
- ECOG performance status 0 – 2
- Adequate hematologic, hepatic and renal function

Note: Approvals will only be given for one of GIPNSUNI or GIPNEVER – not both, unless due to intolerance within the first month of therapy.

EXCLUSIONS:
- Pregnancy
- Significant cardiovascular disease and/or LVEF less than 55
- Uncontrolled hypertension

TESTS:
- Baseline: CBC, differential, platelets, sodium, potassium, creatinine, albumin, bilirubin, ALT, alkaline phosphatase urine analysis, TSH.
- Before each cycle: CBC, differential and platelets, urine analysis, creatinine, uric acid, ALT, Bilirubin. TSH every other cycle and as clinically indicated.
- MUGA scan or echocardiogram if clinically indicated or if history of cardiac problems

PREMEDICATIONS
- Antiemetic protocol for Low-Moderate emetogenic chemotherapy protocols (see SCNAUSEA)

TREATMENT:

<table>
<thead>
<tr>
<th>Drug</th>
<th>Dose</th>
<th>BC Cancer Administration Guideline</th>
</tr>
</thead>
<tbody>
<tr>
<td>SUNItinib</td>
<td>37.5 mg once daily continuously*</td>
<td>PO starting dose.</td>
</tr>
</tbody>
</table>

*Note: 4 weeks of treatment comprise 1 cycle
Continue until disease progression or intolerable adverse effect(s).
DOSE MODIFICATIONS (A, B & C):
A. Dose Modifications for HEMATOLOGIC Toxicity
B. Dose Modifications for NON-HEMATOLOGIC Toxicity
C. Dose ESCALATION

Table 1: Dose Modification Levels for All Toxicity

<table>
<thead>
<tr>
<th>Agent</th>
<th>Dose Level -1</th>
<th>Starting Dose</th>
<th>Dose Level +1</th>
</tr>
</thead>
<tbody>
<tr>
<td>SUNItinib</td>
<td>25 mg PO once daily</td>
<td>37.5 mg PO once daily</td>
<td>50 mg PO once daily</td>
</tr>
</tbody>
</table>

A. Hematological Toxicity:

<table>
<thead>
<tr>
<th>ANC (x10^9/L)</th>
<th>Platelets (x10^9/L)</th>
<th>Dose (all drugs)</th>
</tr>
</thead>
<tbody>
<tr>
<td>greater than or equal to 1.0 and greater than or equal to 75</td>
<td>100%</td>
<td></td>
</tr>
<tr>
<td>less than 1.0 or less than 75</td>
<td>Delay</td>
<td></td>
</tr>
</tbody>
</table>

B. Non-Hematologic Toxicity:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Diarrhea</th>
<th>Nausea</th>
<th>Dose</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Increase of 2-3 stools/day, or mild increase in loose watery colostomy output</td>
<td>Lose of appetite without alteration in eating habits.</td>
<td>Maintain dose level</td>
</tr>
<tr>
<td>2</td>
<td>Increase of 4-6 stools, or nocturnal stools or mild increase in loose watery colostomy output</td>
<td>Oral intake decreased without significant weight loss, dehydration or malnutrition; IV fluids indicated &lt;24 hrs</td>
<td></td>
</tr>
<tr>
<td>3</td>
<td>Increase of 7-9 stools/day or incontinence, malabsorption; or severe increase in loose watery colostomy output</td>
<td>Inadequate oral caloric or fluid intake; IV fluids, tube feedings, or TPN indicated ≥24 hrs</td>
<td>Delay until less than or equal to grade 1. Dose reduce by - 1 dose level</td>
</tr>
<tr>
<td>4</td>
<td>Increase of 10 or more stools/day or grossly bloody colostomy output or loose watery colostomy output requiring parenteral support; dehydration</td>
<td>Life-threatening consequences.</td>
<td></td>
</tr>
</tbody>
</table>
Other Non-Hematologic Toxicity:

<table>
<thead>
<tr>
<th>Grade of SUNItinib-related adverse events</th>
<th>Dose Adjustments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Grade 0 - 2</td>
<td>100%</td>
</tr>
</tbody>
</table>
| Grade 3 - 4                              | Delay until less than or equal to grade 1  
Dose reduce by 1 dose level |

C. Dose Escalation:

- May increase to +1 dose level if no response after 8 weeks, with grade 1 or lower non-hematologic or grade 2 or lower hematologic treatment related adverse events.

PRECAUTIONS:

1. **Neutropenia**: Fever or other evidence of infection must be assessed promptly and treated aggressively. Refer to BC Cancer Febrile Neutropenia Guidelines.

2. **Cardiac Toxicity**:
   - **Asymptomatic Patients** – SUNItinib continuation based on serial LVEFs

<table>
<thead>
<tr>
<th>Relationship of LVEF to LLN</th>
<th>Absolute Decrease Of less than 10%</th>
<th>Absolute Decrease Of 10 -15%</th>
<th>Absolute Decrease Of ≥ 16%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Within Normal Limits</td>
<td>Continue</td>
<td>Continue</td>
<td>Hold *</td>
</tr>
<tr>
<td>1-5% below LLN</td>
<td>Continue</td>
<td>Hold *</td>
<td>Hold *</td>
</tr>
<tr>
<td>Greater than or equal to 6 % below LLN</td>
<td>Continue *</td>
<td>Hold *</td>
<td>Hold *</td>
</tr>
</tbody>
</table>

LLN = Lower Limit of Normal

- * Repeat LVEF assessment after 4 weeks
- If criteria for continuation are met – resume SUNItinib
- If 2 consecutive holds or a total of 3 holds occur, discontinue SUNItinib

**Symptomatic Patients**

- Symptomatic patients with evidence of cardiac dysfunction should have SUNItinib discontinued

3. **Renal dysfunction**: Only a very small percentage of SUNItinib and its metabolites are excreted by the kidney. SUNItinib appears safe in patients with mild renal impairment (creatinine less than or equal to 2x upper limit of normal). No data exist for SUNItinib in patients with moderate to severe kidney failure.
4. **Hepatic dysfunction:** SUNItinib is mainly metabolized and excreted through the liver. SUNItinib appears safe in patients with mild hepatic impairment (bilirubin less than or equal to 1.5x upper limit of normal). No data exist for SUNItinib in patients with moderate to severe hepatic impairment.

5. **Sunitinib-Induced hypothyroidism:** All patients on SUNitinib should be observed closely for signs and symptoms of thyroid dysfunction (such as fatigue). Patients should have thyroid function laboratory monitoring done (TSH every cycle for cycles 1-4 then every 2-3 months). Patients with minor TSH elevations (up to 20 mU/L), no symptoms and no pre-existing heart disease can be managed with observation. Patients with TSH elevation and symptoms and/or pre-existing heart conditions should be treated as per current recommended guidelines.

Thyroid hormone replacement therapy should be initiated and maintained as follows:

<table>
<thead>
<tr>
<th>Age and Cardiac Status</th>
<th>Usual Starting Dose</th>
</tr>
</thead>
</table>
| Adults under 50 yr
  with cardiac disease: | Levothyroxine 25 – 50 mcg PO daily |
| Adults over 50 yr
  without cardiac disease: | Levothyroxine 25 – 50 mcg PO daily |
| Adults over 50 yr
  with cardiac disease: | Levothyroxine 12.5 – 25 mcg PO daily |

Dose adjustments are needed every 6-8 weeks, based on clinical and laboratory parameters. Close observation of liver function tests and thyroid function is required when patients are receiving both SUNItinib and thyroid hormone replacement therapy.

6. **Drug Interaction:** SUNItinib is predominantly metabolized and excreted through cytochrome P450 3A4 in the liver. Potential drug interactions with cytochrome P450 3A4 interacting agents must be considered (see also: [http://medicine.iupui.edu/flockhart/table.htm](http://medicine.iupui.edu/flockhart/table.htm)).

7. **Hypertension:**

   - Patients with hypertension should exercise caution while on SUNItinib. Rigorous treatment of blood pressure is necessary, since Sunitinib can cause a rapid onset of high blood pressure. Temporary suspension of SUNItinib is recommended for patients with severe hypertension (greater than 200 mmHg systolic or greater than 110 mmHg diastolic). Treatment with SUNItinib may be resumed once hypertension is controlled (see also [http://www.hypertension.ca](http://www.hypertension.ca)).
   
   - It is recommended that for at least the first 2 cycles of treatment patients monitor their blood pressure daily (home measurements, GP’s office, etc.) and keep a
journal of their blood pressure measurements that can be submitted to the physician.

Call the GI Systemic Therapy physician at your regional cancer centre or the GI Systemic Therapy Chair Dr. Janine Davies at (604) 877-6000 or 1-800-670-3322 with any problems or questions regarding this treatment program.
