BC Cancer Protocol Summary for Therapy for Advanced Ovarian Cancer using an Aromatase Inhibitor

**Protocol Code**  
GOOVAI

**Tumour Group**  
Gynecologic Oncology

**Contact Physician**  
Dr. Anna Tinker

**ELIGIBILITY:**
- Hormonal treatment for advanced ovarian cancer (epithelial ovarian, primary peritoneal, or fallopian tube carcinoma) in postmenopausal women

**EXCLUSIONS:**
- Premenopausal women
- Patients who have progressed on an alternate aromatase inhibitor (note: may be used by patients who did not tolerate an alternate aromatase inhibitor).

**TESTS**
Baseline: If clinically indicated: serum cholesterol, triglycerides  
Biannual bone density test

**TREATMENT:**

<table>
<thead>
<tr>
<th>Drug</th>
<th>Dose</th>
<th>BC Cancer Administration Guideline</th>
</tr>
</thead>
<tbody>
<tr>
<td>letrozole</td>
<td>2.5 mg daily until evidence of progression</td>
<td>PO</td>
</tr>
<tr>
<td>OR</td>
<td></td>
<td>PO</td>
</tr>
<tr>
<td>anastrozole</td>
<td>1 mg daily until evidence of progression</td>
<td>PO</td>
</tr>
</tbody>
</table>

Funding for aromatase inhibitors other than letrozole or anastrozole should be requested via the BC Cancer Compassionate Access Program (CAP).

**PRECAUTIONS:**
1. **Hepatic dysfunction:** Aromatase inhibitors are considered safe in mild-to-moderate hepatic dysfunction but have not been studied in severe hepatic dysfunction.
2. **Bone density:** The long-term effects of aromatase inhibitors on bone density in adjuvant therapy patients are unknown. Supplementation with calcium and vitamin D and regular weight bearing exercise is recommended. A bisphosphonate should be
considered if clinically indicated. Caution in patients with an already established diagnosis of clinically significant osteoporosis.

3. **Hyperlipidemia**: An increase in cholesterol or triglyceride levels may occur when an aromatase inhibitor is initiated. Levels may need to be checked during the first few months of therapy, especially in those patients with prior significant lipid elevations.

**Contact Dr. Anna Tinker or tumour group delegate at (604) 877-6000 or 1-800-663-3333 with any problems or questions regarding this treatment program.**
