Low Cost Dental Programs for Cancer Patients

BC Cancer Agency Dental Clinic
BCCA registered patients can have a no-charge dental consult (including x-rays) to evaluate a dental problem related to their cancer. When active treatment is required, this may be provided at a Centre but at usual-and-customary fees as determined by the College of Dentistry fee guide. In both Vancouver Centre and Fraser Valley Centre, we have the additional option of dental residents providing the care at a reduced fee.

Dental Clinics
The following community dental programs provide dental treatments for free or at reduced cost for adults living with low income in BC. Call the programs for detailed information on program eligibility, hours of service and cost. Information is subject to change without notice please contact the service providers directly to verify.
