

Skin Cancer – Interactive Scenarios & Practical Approaches for Primary Care

Up to 2.75 Mainpro+ credits, virtually presented

November 13, 2020, 1 – 4 p.m.

Register today: fpon.ca

Please join us Friday afternoon, November 13, 2020 for a virtual opportunity to advance your skin cancer knowledge to the next level. Learn through interactive, case-based presentations led by expert dermatologists highlighting common skin cancers, and a leading surgical oncologist delving into melanoma – all geared to the practice needs of primary care.

Registration and details: fpon.ca

Cost: \$50/all disciplines

There are two parts to the afternoon brought to you by the Family Practice Oncology Network. Our goals are for every participant to be able to:

Dermatology focus:

- Describe effective and practical skin cancer prevention strategies;
- Demonstrate improved visual literacy of malignant skin lesions;
- Determine appropriate management of common skin cancers by primary care physicians; and
- Review principles of skin cancer screening in high risk populations.

Melanoma focus:

- Review indications and pitfalls of sentinel lymph node biopsy for melanoma;
- Summarize a practical approach to melanoma staging; and
- Describe current management implications of melanoma staging and of lymph node recurrence.

Our Outstanding Educators:

Dr. Harvey Lui is a dermatologist on staff at BC Cancer and Vancouver General Hospital. He is also a clinician scientist at BC Cancer Research with expertise in noninvasive skin cancer diagnostic methods and biomedical optics.

Dr. Sunil Kalia is a dermatologist, and part of BC Cancer's Skin Tumor Group and BC Cancer Research's Cancer Control Group. He is also on staff at Vancouver General Hospital and BC Children's Hospital.

Dr. Francis Zih is a Surgical Oncologist at Surrey Memorial Hospital and a Clinical Instructor, General Surgery, at the University of British Columbia.
