

**Learning Objectives:
Family Practice Oncology CME Day 2019
November 23, 2019**

Participants will be able to:

- Describe current developments and practice changing guidelines impacting primary cancer care;
- Translate new knowledge of oncology resources to strengthen clinical care; and
- Improve cancer management via their resulting influence on patient care

Lecture 1: Density Matters – Breast Cancer Screening Guidelines! (45 mins, Dr. Colin Mar)

Participants will be able to:

- Explain breast density as a risk factor for breast cancer;
- Cite available investigations for breast cancer screening; and
- Discuss breast cancer risk factors.

Lecture 2: Cervical Cancer Screening and Management Updates (45 mins, Dr. Murette Lee)

Participants will be able to:

- Describe the evolution of cervical cancer screening;
- Relay preventative practices; and
- Summarize current management by disease stage.

Lecture 3: Childhood Cancer Insights: (45 mins, Drs. Amanda Li and Rod Rassekh)

CAR T-Cell Therapy Explained

Participants will be able to:

- Describe the current use of chimeric antigen receptor (CAR) T-Cells in pediatric cancer therapy;
- Identify short and long term toxicities associated with CAR T-Cell Therapy; and
- Appreciate the challenges in CAR T-Cell Therapy delivery in BC.

Cannabis in Kids with Cancer

Participants will be able to:

- Summarize the use of medical cannabis in pediatrics;
- Discuss potential side-effects of cannabinoids in pediatric cancer therapy; and
- Discuss why parents in British Columbia request medical cannabinoid treatment for their

children with cancer.

Lecture 4: Hereditary Cancer Resources (45 mins, Drs. Sophie Sun and Intan Schraeder)

Participants will be able to:

- Describe screening for hereditary cancer impacts on therapeutic decisions;
- Identify eligibility requirements for provincially funded screening; and
- Cite resources and factors to consider regarding private pay genetic testing.

Lecture 5: Serious Illness Conversation Primer (45 mins, Dr. Lauren Daley)

Participants will be able to:

- Describe key points and benefits of the Serious Illness Conversation Guide;
- Summarize the benefits of advance care planning (ACP) discussions with patients and families; and
- Source evidence-based prognostic tools to identify patients for ACP discussions.

Lecture 6: Tinkering with TSH – Thyroid Cancer Follow-up Guidelines (45 mins, Dr. Jonn Wu)

Participants will be able to:

- Cite the importance of clinical follow-up evaluations including monitoring for recurrence;
- Summarize follow-up investigations including optimal management of TSH suppression; and
- Describe late effects and recommended screening investigations thereof.

Lecture 7: Cancer Care Resource Gems (45 mins, Drs. Raziya Mia and Sherry Chan)

Participants will be able to:

- Appreciate and identify the wealth of available physician resources for cancer care;
- Navigate the BC Cancer Website effectively from a physician's perspective; and
- Share these resources and tips with their medical colleagues.
