

Record of Exposure to Hazardous Drugs Group 1 and Group 2

All employees who prepare or administer hazardous drugs are required to document their daily exposure as per **Provincial Systemic Therapy Policy V-10 : (Hazardous Drugs Safe Handling Standards) and WorkSafe BC regulations**

This Record of Exposure template contains BC Cancer approved hazardous drugs administered intravenously and by injection. **These drugs represent an occupational hazard to healthcare workers** and should always be handled with the use of recommended engineering controls (i.e. Closed System Drug Transfer Device), and personal protective equipment (PPE), regardless of dosage form. Any clinical trials drugs, oral agents or other drugs classified as hazardous and not presently on this list may be added to the blank spaces provided below.

To confirm if any drug is classified as Group 1 or Group 2 hazardous always refer to the most recent up to date BC Hazardous Drugs list and BC Cancer addendum (includes all oral agents) at: <http://www.bccancer.bc.ca/drug-database-site/Documents/HD%20List.pdf>.

RN Name: _____ Month: _____ Year: _____

Group 1 Group 2

	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	Total	
Amsacrine																																	
Arsenic trioxide																																	
Atezolizumab																																	
Avelumab																																	
Azacitidine																																	
Bacillus Calmette - Guerin (BCG)																																	
Bendamustine																																	
Bleomycin																																	
Blinatumomab																																	
Brentuximab																																	
Cabazitaxel																																	
Carboplatin																																	
Carfilzomib																																	
Carmustine																																	
*Cemiplimab																																	
Cisplatin																																	
Cladribine																																	
Cyclophosphamide																																	
Cytarabine																																	
Dacarbazine																																	
Dactinomycin																																	
Daunorubicin HCl																																	
Dexrazoxane																																	
Docetaxel																																	
Doxorubicin (all formulations)																																	
Durvalumab																																	

Record of Exposure to Hazardous Drugs Group 1 and Group 2

	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31
Epirubicin																															
Eribulin																															
Etoposide																															
Fludarabine																															
Fluorouracil																															
Gemcitabine																															
*Gemtuzumab ozogamicin																															
Idarubicin																															
Ifosfamide																															
Inotuzumab ozogamicin																															
Irinotecan (all formulations)																															
Melphalan																															
Methotrexate																															
Mitomycin																															
Mitoxantrone																															
Oxaliplatin																															
Paclitaxel (all formulations)																															
Pamidronate																															
Pemetrexed																															
Polatuzumab vedotin																															
Pralatrexate																															
Raltitrexed																															
Romidepsin																															
*Sirolimus																															
Streptozocin																															
Temsirolimus																															
Teniposide																															
Thiotepa																															
Topotecan																															
Trastuzumab emtansine																															
Vinblastine																															
Vincristine																															
Vinorelbine																															
Zoledronic acid																															

Record of Exposure to Hazardous Drugs Group 1 and Group 2

ALL INJECTIONS

RN Name: _____

Month: _____

Year: _____

	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	Total	
Azacitadine																																	
Buserelin LA (Suprefact Depot)																																	
Bortezomib																																	
Degarelix (Firmagon)																																	
Fulvestrant (Faslodex)																																	
Goserelin (Zoladex)																																	
Leuprolide LA (Lupron depot)																																	
Leuprolide (Eligard)																																	
Testosterone enanthate																																	

Oral agents or any additional hazardous drugs (i.e. Special Authority Program drugs) not found above may be added to the spaces below. Please confirm by checking the updated BC Provincial Hazardous Drugs list and the BC Cancer Addendum to the BC Hazardous Drug List at: <http://www.bccancer.bc.ca/drug-database-site/Documents/HD%20List.pdf> These drugs represent an occupational hazard to healthcare workers and should always be handled with the use of recommended engineering controls and personal protective equipment (PPE), regardless of dosage form.
