

For patients attending their lung screening appointment

WHAT HAPPENS DURING YOUR LUNG SCREENING?

STEP 1

You will lie on the scanning table with your arms placed above your head.

STEP 2

You will hold your breath for a few seconds as the table slides you into the scanner.

STEP 3

The scanner will take detailed images of your lungs. The scan takes less than 10 seconds and is not painful. You do not need to take any medications or receive any needles for this test.

ALL DONE !
