

BC Cancer Agency

CARE + RESEARCH

An agency of the Provincial Health Services Authority

Cancer Surveillance & Outcomes

Cancer Incidence Projections

British Columbia 2013 to 2028

Estimated New Cancer Diagnoses for 2013 by Age at Diagnosis and Gender

(Version_BC.CAN16)

British Columbia

Poisson regression models of the trend from 2003-2012 along with age, sex and region were fit for each cancer type. Mean rates for 2011-2012 replaced projected rates for breast (female only) and prostate as extrapolation from recent trends was not feasible. Projections were obtained by multiplying the projected rates by population projections obtained from BC STATS. Row and column totals were obtained prior to rounding.

Estimated New Cancer Diagnoses for 2019 by Age at Diagnosis and Gender

(Version_BC.CAN16)

British Columbia

Poisson regression models of the trend from 2003-2012 along with age, sex and region were fit for each cancer type. Mean rates for 2011-2012 replaced projected rates for breast (female only) and prostate as extrapolation from recent trends was not feasible. Projections were obtained by multiplying the projected rates by population projections obtained from BC STATS. Row and column totals were obtained prior to rounding.

Estimated New Cancer Diagnoses for 2025 by Age at Diagnosis and Gender

(Version_BC.CAN16)

British Columbia

Poisson regression models of the trend from 2003-2012 along with age, sex and region were fit for each cancer type. Mean rates for 2011-2012 replaced projected rates for breast (female only) and prostate as extrapolation from recent trends was not feasible. Projections were obtained by multiplying the projected rates by population projections obtained from BC STATS. Row and column totals were obtained prior to rounding.

Estimated Cancer Deaths for 2015 by Age at Death and Gender

(Version_BC.CAN16)

British Columbia

Poisson regression models of the trend from 2003-2012 along with age, sex and health authority were fit for each cancer type. Projections were obtained by multiplying the projected rates by population projections obtained from BC STATS. Row and column totals were obtained prior to rounding.

Estimated Cancer Deaths for 2022 by Age at Death and Gender

(Version_BC.CAN16)

British Columbia

Poisson regression models of the trend from 2003-2012 along with age, sex and health authority were fit for each cancer type. Projections were obtained by multiplying the projected rates by population projections obtained from BC STATS. Row and column totals were obtained prior to rounding.
