

## BC Cancer ST Program Updates for Oct 2025

AFFECTED APPLICATION(S)	PowerChart
AFFECTED AREA(S)	BC Cancer Sites / VCH Oncology Sites
NET NEW, OR UPDATE TO EXISTING BUILD	Update to Existing Build

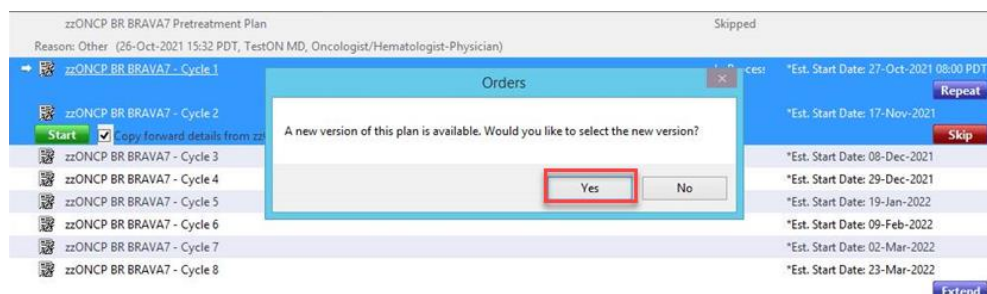

### What has Changed?

Any changes released that affect Oncology Regimens and PowerPlans/Cycles for the **BC Cancer Systemic Therapy (ST) Program** will be communicated monthly via Special Bulletin.

These notification changes are important for Nursing staff, Pharmacy, and Providers to be aware of for their patient's care.

### For Providers:

- For PowerPlans that are versioned: If your patient has already started on a Regimen, when you order the next cycle PowerPlan, a pop-up window will appear to indicate a new version is required.
  - Click Yes to accept the new version.
  - Do not** use the Copy Forward functionality to ensure that the updates apply.

- IMPORTANT:** Any change from the standard treatment regimen (dose modification, addition of pre-med, etc.) in the previous cycle will need to be manually added to the cycle that is being ordered with the new version (see additional documentation regarding versioning).

Please see this month's changes below.

## Protocols: GIGAVRAMT

**Cycles/PowerPlans:** Associated Regimen and PowerPlan

### Changes:

- Updated **Clinical Decision Support** Note: *Link to Protocol: Second- or Third-Line Therapy for Metastatic or Locally Advanced Gastric or Gastroesophageal Junction Cancer Using Weekly PACLitaxel and Ramucirumab.*

ONCP GI GIGAVRAMT - Cycle 1, Chemotherapy (Day 1, 8, 15) (Future Pending) *Est. 28-Aug-2025 08:00 PDT - 28 Days			
	Day 1	Day 8	Day 15

Link to Protocol: Therapy for Advanced Solitary Fibrous Tumours and Hemangiopericytoma Using Temozolomide and Bevacizumab		
Revised: 1 Oct 2025		
Pre-Chemo Metrics		
May proceed with treatment on Day 8 if:		
Blood Pressure Less Than or Equal to 150/100 mmHg within 96 hours		
Laboratory urinalysis for protein Less Than 1 g/L, or urine dipstick for protein negative or 1+ within 96 hours		
If dipstick urine results are 2+ or 3+ or greater than or equal to 1 g/L laboratory urinalysis for protein then a 24 hr urine for total protein must be done within 3 days prior to next cycle		
May proceed with treatment on Day 22 if:		
Blood Pressure Less Than or Equal to 150/100 mmHg within 96 hours		
Treatment Regimen		
Zero Time	0 hr	0 hr

- Updated order comment from **Bevacizumab**: [...] Administer over: 10 minutes [...].

<input checked="" type="checkbox"/>	bevacizumab (bevacizumab - oncology) 5 mg/kg, IV, once oncology, administer over: 10 minute, drug form: bag Flush line with Sodium Chloride 0.9% pre and post dose. Days 8 and 22	0 min	0 min
		Planned	Planned

- Pre-Chemo Metrics updated to remove Bilirubin order and add **Total Bilirubin** order.

Component	Status	Order
ONCP SA SATEMBEV - Cycle 1, Prescriptions (Future Pending)		
Pre-Chemo Metrics		
May proceed with treatment on Day 1 if:		
Neutrophil Greater Than or Equal to $1.5 \times 10^9/L$ within 24 hours		
Platelet Count Greater Than or Equal to $100 \times 10^9/L$ within 24 hours		
Total Bilirubin Less Than 25 micromol/L within 24 hours		
Alanine Aminotransferase Less Than or Equal to $2.5 \times ULN$ within 24 hours		

- Infusion Chemotherapy Visit order sentence updated to reflect *ONCP SA SATEMBEV*.
