It's time for your next Lung Screening CT scan. Lung screening works by finding cancer early, even when you are not feeling any symptoms. When cancer is found early, there are more treatment options and a better chance of success. Early detection has been shown to increase the chance of survival of those diagnosed with lung cancer by 20%.

Please contact the BC Cancer Lung Screening Program at 1-877-717-5864 to arrange for your CT scan referral. During this call we will update your health record including your health care provider and contact information. After the call, we will send your referral to the hospital, who will contact you to book your appointment. Please do not contact the hospital directly as they are unable to book your appointment without a referral.

ARRANGE A CT SCAN REFERRAL

Please call BC Cancer Lung Screening at **1-877-717-5864** (Monday to Friday 8:30am - 4:30pm) to arrange a CT scan referral.

It is important that you return to screening soon. Lung screening works best when the radiologists can compare your scans over time to look for any small changes that may have occurred since your last scan.

If you no longer wish to continue screening, please contact us to stop future reminder notices from being sent to you. For more information about lung screening, please visit screeningbc.ca/lung.

I hope that you will take care of your health and consider screening today.

Regards,

Dr. Stephen Lam
Medical Director, Lung Screening Program
