

BC Cancer ST Program Updates for November 2025

AFFECTED APPLICATION(S)	PowerChart
AFFECTED AREA(S)	BC Cancer Sites / VCH Oncology Sites
NET NEW, OR UPDATE TO EXISTING BUILD	Update to Existing Build

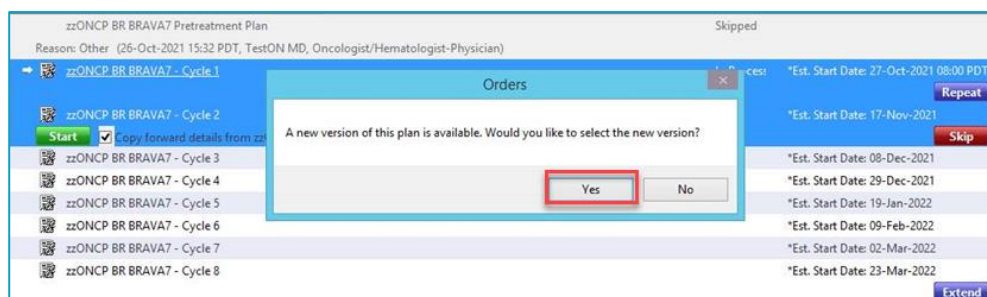

What has Changed?

Any changes released that affect Oncology Regimens and PowerPlans/Cycles for the **BC Cancer Systemic Therapy (ST) Program** will be communicated monthly via Special Bulletin (SB).

Notification changes are important for Nursing staff, Pharmacy, and Providers to be aware of for their patient's care.

For Providers:

- For PowerPlans that are versioned: If your patient has already started on a Regimen, when you order the next cycle PowerPlan, a pop-up window will appear to indicate a new version is required.
 - Click **Yes** to accept the new version.
 - Do not** use the Copy Forward functionality to ensure that the updates apply.

- IMPORTANT:** Any change from the standard treatment regimen (dose modification, addition of pre-med, etc.) in the previous cycle will need to be manually added to the cycle that is being ordered with the new version (see additional documentation regarding versioning).

Please see this month's changes below.

Protocols: LYCLLIV

Cycles/PowerPlans: Pretreatment Plan

Changes:

- In the Baseline Labs Phase, the following was removed:
 - Yellow CDS note "Baseline labs to be done within 72 hours before first treatment"
